## 1. Objectives

This document describes the NACI Policy and the procedure for determination of suitability and acceptance of Conformity Assessment Schemes for the purpose of covering them under Scope of Accreditation of Conformity Assessment Bodies (CABs) to meet the requirements of ISO 17011-2017.

## 2. Scope

This document is applicable to all Conformity Assessment Schemes (CAS) operated by NACI namely, accreditation schemes for specific management systems certification, product/process certification, inspection, personnel certification.

## 3. Responsibilities

The responsibilities for these procedures are discharged under the supervision of VPs in charge of each scheme. The Management Representative supervises effectiveness of the actions.

## 4. References & Regulations

- 4.1 ISO/IEC 17011: 2017 Conformity assessment — General requirements for accreditation bodies accrediting conformity assessment bodies
- 4.2 NACI-M00 Accreditation manual
- 4.3 ISO/IEC 17000:2020 Conformity assessment — Vocabulary and general principles.
- 4.4 ISO/IEC 17065:2012, Conformity Assessment - Requirements for Bodies Certifying Products, Processes and Services
- 4.5 ISO/IEC 17067:2013 Conformity assessment- Fundamentals Of product certification and guidelines for product certification schemes.
- 4.6 ISO/IEC 17026:2015, Conformity assessment - Example of a Certification scheme for tangible products.
- 4.7 ISO/IEC 17024:2012 Conformity assessment – General requirements for bodies operating certification of persons.
- 4.8 IAFMD25:2023 Criteria for evaluation of conformity Assessment schemes

## 5. Terms & Definitions

All definitions related to the normative documents listed in clause 4 above apply. In addition, the terms and definitions below apply specifically:

5.1 **NACI**: National Accreditation Center of Iran

5.2 **CAB**: Conformity Assessment Body

5.3 **CAS**: conformity assessment schemes

5.4 **Type of CAS**:

The CAS for which the CABs offer conformity assessment generally belong to one of the following categories:

5.4.1 **Internationally known CAS** which are owned by independent bodies (called scheme owners) and are operated at a global level by various CABs, approved by the scheme owners directly or based on accreditation by Accreditation Bodies recognized by the scheme owners. These schemes are generally developed by the scheme owners in accordance with the principles described for example in clauses 5 and 6 of ISO/IEC 17067:2013 for product / process certification or clause 8 of ISO/IEC 17024 for personnel certification and are operated under their control by approved (generally accredited) CABs. e.g., Global Gap Scheme, FSSC 22000 Scheme.

5.4.2 **CAS embodied in regulations promulgated under the control of respective governments** e.g., CE marking scheme in European Union, ...

5.4.3 **CAS developed by governmental agencies** or operated by regulators even if voluntary

---	--	--

5.4.4 CAS developed by nongovernmental agencies in fulfillment of their organizational objectives.

5.4.5 These could be developed by group of industries or industry associations, purchasers, distribution/ retail chains, consumers /consumer associations, trade associations etc.

5.4.6 CAS which are developed and operated by CABs themselves

## 6. Procedure

### 6.1 NACI policy for acceptance of CAS for the purpose of accreditation

6.1.1 CAS belonging to any of the types as specified at clause 5.4 above are acceptable provided they meet the generic criteria/requirements as specified in section 6.2 of this document and their suitability is established. However, in case of schemes belonging to categories specified in 5.4.1 & 5.4.2, exceptions may be accepted at the discretion of NACI president.

The reasons for permitting such exceptions are:

In case of 5.4.1 the scheme owner would be an independent body who takes responsibility for validation of the scheme. The scheme should have been in the market for some time (say 1 – 2 years) with evidence of its acceptance by the relevant stakeholders, which would be deemed to have automatically validated the scheme. In case of new schemes, if all the requirements of this document are met with, then the same may be accepted even without having been in the market. However, the scheme will be subjected to a review by NACI after 2 years of their acceptance.

6.1.2 In case of 5.4.2 the government/ regulator being the scheme owner takes responsibility on behalf of the stakeholders. It should not prevent NACI from advising the government/regulator on the desirability of aligning the scheme with the policy and criteria laid out in this document which is based on international norms.

Note: In all other cases the schemes would be required to meet the criteria laid down in section 6.2 of this document.

6.1.3 The evaluation for determination of suitability of Conformity Assessment Scheme shall be done by NACI at the time, the application for accreditation for a specific scheme is made by any CAB for the first time. Once a specific scheme has been evaluated in accordance with the IAFMD25: 2023 and accepted by NACI, the same shall not be reevaluated in case any other CAB applies for accreditation for the same scheme. NACI may decide to reevaluate the scheme, when any major changes occur in the contents of the scheme.

### 6.2 Requirements and criteria for evaluation of suitability of CAS

#### 6.2.1 General requirements

6.2.1.1 The Conformity Assessment Scheme (CAS) shall have been developed and maintained by a Scheme Owner (SO) having responsibility for the CAS and fulfilling the following requirements:

6.2.1.2 The scheme owner shall be a legal entity. A governmental scheme owner is deemed to be a legal entity on the basis of its governmental status. In cases where the CABs themselves are the scheme owners, the legal status of the scheme owners shall be that of the certification bodies themselves. In respect of other type of scheme owners, the legal entity status shall be established and demonstrated.

6.2.1.3 The scheme owner shall be able to take on full responsibility for the objectives, the

 <p><b>NACI</b> National Accreditation Center of Iran مرکز ملی تایید صلاحیت ایران</p>	<p><b>NACI Requirement for Acceptance of Conformity Assessment Schemes</b></p>	<p>Document code: <b>NACI-P25</b> Revision No:1 Revision date: <b>Jul.2023</b> Page 5 of 9</p>
---	--	--

content and the integrity, validity and robustness of the scheme. During the development of the scheme, the scheme owner should evaluate and manage the risks/liabilities arising from implementation of the scheme and provide appropriate safeguards in such a way that the objectives of relevant Conformity Assessment to be met. Based on evaluation, the scheme owner may prescribe minimum requirements for the professional liability insurance limits for the CAB approved for operating the scheme.

## **6.2.2 Development of Conformity Assessment Schemes**

- 6.2.2.1 The scheme owner should set up an institutional structure for the development, operation and management of the scheme. The scheme owner shall ensure that the scheme is developed by persons competent in both technical and conformity assessment aspects. In cases where the CAB itself is the scheme owner, the structure may be created within the legal entity, which is preferably independent from the structure involved in operation of the conformity assessment. All the requirements applicable to the scheme owner as described in this document then will be applicable to this structure with in the CAB.
- 6.2.2.2 To ensure that the scheme owner understands the assumptions, influences and consequences involved in establishing, operating and maintaining a scheme on an ongoing basis, the scheme owner shall identify stakeholders and seek their opinions and participation in development of the scheme keeping balance of interest in view.
- 6.2.2.3 The scheme owner shall document the content and description of the scheme. The description shall be detailed enough to enable the CABs to implement the same in an unambiguous and consistent manner. The scheme owner shall maintain the scheme and provide guidance when required. The scheme documents shall be publically available to all stakeholders on its website.

## **6.2.3 Operation and maintenance of the scheme**

- 6.2.3.1 The scheme owner should ensure that the scheme is regularly reviewed, including confirmation that it is fulfilling its objectives, in accordance with a process that includes participation of the stakeholders.
- 6.2.3.2 Review of scheme operation - The scheme owner should define a process for reviewing the operation of the scheme on a periodic basis in order to confirm its validity and to identify aspects requiring improvement, taking into account feedback from stakeholders. The review shall include provisions for ensuring that the scheme requirements are being applied in a consistent manner.
- 6.2.3.3 Changes in specified requirements - The scheme owner should monitor the development of the standards and other normative documents which define the specified requirements used in the scheme. Where changes in these documents occur, the scheme owner should have a process for making the necessary changes in the scheme, and for managing the implementation of the changes (e.g. transition period) by the CABs, clients and, where necessary, other stakeholders. The scheme owner should define a process for managing the implementation of other changes to the rules, procedures and management of the scheme.
- 6.2.3.4 In order to confirm that the Conformity Assessment Scheme has market/stakeholder acceptance, the scheme should have been in existence for 1–2 years.

## **6.2.4 Requirements with respect to contents of the Conformity Assessment Schemes:**

CAS shall specify shall specify the following elements (contents of the Conformity

 <p><b>NACI</b> National Accreditation Center of Iran مرکز ملی تایید صلاحیت ایران</p>	<p><b>NACI Requirement for Acceptance of Conformity Assessment Schemes</b></p>	<p>Document code: <b>NACI-P25</b> Revision No: <b>1</b> Revision date: <b>Jul.2023</b> Page 6 of 9</p>
---	--	--

Assessment Schemes), as applicable:

**6.2.4.1 General aspects** - such as the scope of the scheme, including the description of the objects of conformity assessment.

**6.2.4.2 The requirements against which the objects of conformity assessment are evaluated**

These shall generally be those contained in a standard or other normative documents. These could be national/international standards, regulations, etc.

**6.2.4.3** NACI shall consider standards which meet the following criteria:

- a) The standard is issued by a legal entity.
- b) The standard has been developed in consultation with technically competent committee and stake holders of the standard and an effective mechanism exists for its periodic review/revision.
- c) The standard shall have creditability and acceptance in industry and/or with appropriate regulatory authorities, if applicable
- d) The standard shall be publicly available for implementation by the industry.

**6.2.4.4** Guidelines are not considered conducive to evaluation and hence will need to be converted to normative requirements/certification criteria.

Note: Typically process and service criteria may have these kind of issues.

**6.2.4.5** These requirements could be established by the scheme owner as part of establishing the Certification scheme. In such circumstances, the principles and guidance given in clauses 4 and 5 of the document ISO/IEC 17007 “Conformity assessment – Guidance for drafting normative documents suitable for use for conformity assessment” should be followed.

**6.2.5** Requirements for conformity assessment activities

These requirements should generally be described under the general heading “Conformity Assessment Process Requirements”. Developers of conformity assessment Schemes (Scheme Owners) should follow the functional approach to conformity assessment, which provides a framework of basic conformity assessment functions and their relationships.

**6.2.5.1** Functional approach identifies the following generic functions or elements that are normally present in any conformity assessment scheme:

- a) **Selection** of the object(s) of conformity assessment, including selecting specified requirements to be assessed and planning information collection and sampling activities;
- b) **Determination**, including the use of one or more determination methods (e.g. test, audit and/or examination) to develop complete information regarding fulfillment of the specified requirements by the object of conformity assessment or its sample;
- c) **Review and Attestation**, including the review of evidence from the determination stage, and a subsequent attestation that the object of conformity assessment has been reliably demonstrated to fulfil the specified requirements, and any subsequent marking or licensing and their related controls; and
- d) **Surveillance (as applicable)**, including the frequency and extent of surveillance activities and reassessments to ensure the object of conformity assessment continues to fulfill the specified requirements. The need for surveillance will depend upon the type of scheme and whether the claim for continued compliance is permitted by the client over

 <p><b>NACI</b> National Accreditation Center of Iran مرکز ملی تایید صلاحیت ایران</p>	<p><b>NACI Requirement for Acceptance of Conformity Assessment Schemes</b></p>	<p>Document code: <b>NACI-P25</b> Revision No: <b>1</b> Revision date: <b>Jul.2023</b> Page 7 of 9</p>
---	--	--

the validity period of the certification.

**6.2.5.2** The Conformity Assessment Schemes may prescribe additional requirements for CABs. However, the requirements for CABs involved in the conformity assessment process, shall generally not be in contradiction to the requirements of the applicable standards for CABs. They may be additional or stricter than those specified in the relevant standards.

### **6.2.6 The methods and procedures to be used by the CABs**

**6.2.6.1** The methods and procedure, criteria for evaluation as well as reporting requirements shall be decided by the scheme owner/CAB responsible for conformity assessment and ensured that the same are followed by the CABs engaged for the same, for ensuring integrity and consistency of the outcome of the process of conformity assessment. The scheme owner should make use of the provisions described in the respective conformity assessment standards for elaborating the same.

Additional guidance / requirements with respect to time required for evaluation tasks, transfer of certificates, multisite considerations and impartiality requirements for CABs shall be described, as applicable.

**6.2.6.2** The conditions under which the client may use the statement of conformity or marks of conformity should be specified as applicable. Where marks of conformity may be used, ownership, use and control of the marks, etc. should be specified, unless the requirements given in the respective conformity assessment standards sufficiently describe them.

**6.2.6.3** The Conformity Assessment Scheme should describe, as applicable, other generic requirements such as information to be supplied to CAB by the applicant to certification; contents of statement of conformity; resource competence requirements; sampling procedures; acceptance of conformity assessment results from other parties; outsourcing of conformity assessment activities; reporting and use of results of determination and surveillance stages by the CAB and the scheme owner; how non-conformities with the certification requirements are to be dealt with and resolved for the purpose of decision making; surveillance procedures; information about certified clients to be made available to public; general conditions for granting, maintaining, continuing, extending the scope of, reducing the scope of, suspending and withdrawing certification: this should include requirements for discontinuation of advertising and return of certification documents and any other action if the certification is suspended, withdrawn or terminated; content of contracts, between scheme owner and CAB body, scheme owner and clients, CAB and clients, including the rights, responsibilities and liabilities of the various parties; licensing and control of marks; complaint handling system to be maintained by the CAB; reporting to the scheme owners; complaints and appeals to scheme owners; fraudulent claim of certification;

**6.2.6.4** These are optional requirements, relevant only to certain types of conformity assessment activities, hence the scheme owner should decide about specifying them as part of the CAS.

**6.2.6.5** Some of the above requirements may also be covered in the relevant conformity assessment standard as essential requirements (such as ISO 17021-1), in that event the scheme owner may decide that the same shall apply. However, if these requirements are specified as part of the certification scheme, then they shall be appropriate to the type and scope of conformity assessment activity and shall not contradict the requirements specified in the relevant conformity assessment standard. Some of these are also covered as essential requirements, as applicable, in the conformity

**6.2.7 Evaluation of schemes** – The generic requirements/criteria given in this document are evaluated using a generic checklist NACI-F182. In addition, specific criteria for different types of conformity assessment activities such as product certification, personnel

	<b>NACI Requirement for Acceptance of Conformity Assessment Schemes</b>	Document code: <b>NACI-P25</b> Revision No: <b>1</b> Revision date: <b>Jul.2023</b> Page 8 of 9

certification are evaluated using specific checklists.

## **7. Rated Documents**

7.1 Document control procedures **NACI-P01**

7.2 Records control procedures **NACI-P02**

7.3 Accreditation application & assessment procedures **NACI-P10**

## **8. Forms & Records**

8.1 Impartiality & confidentiality form **NACI-F141**

8.2 Document distribution form **NACI-F104**

## **9. Recipients**

Records master list form **NACI-F105** for recording & keeping all records related to these guidelines.

## **10. Withdrawn Documents**
